

We were already building sports equipment, when others were still playing with it!

PLAN FOR PLAYGROUND SOCCER GOAL „HERKULES“, PRODUCT NR.: 08BQ11B7 WITH BASKETBALL ADAPTER - FOR GROUND ANCHORS

Attention!

The ground anchors are to be installed along with the goal. For an installation of the ground anchors before the goal, we recommend to use a pipe of approx. 90mm in diameter or a similar sized block to maintain the correct distances

Up to date information about the dangers of tipping goals, as well as usage videos and how-to guides, can be obtained at our web address:
www.torsicherung.de

Cement suggestion:

XC4, XF1; Cement C 25 / 30, WF, cement steel Bst. 500 A gem. Static. All mentioned statics and foundations are always based on German D-NRW/Münster [Notice regional wind strengths specifications!]

Size info: All dimensions are cm! Sketches are not true to size!

We recommend:

- Acid soils: Several types of quick drying cements are corrosive even to aluminium. To protect ground sockets, we recommend to treat them with Bitumen (Silolack) before installing! All ground sockets are available, on surcharge, with applied Bitumen !
- Available for a drainage module connection!
- To avoid sand enter the ground socket, apply silicone after installation!

Important notice: We are not held responsible for the installation. The presence of the installation plans are considered manufacturer suggestions. Please take under consideration the given regional facts, as example ground type (Natural or artificial grass, synthetic, pavement etc) as well as national and international guidelines and regulations. Check beforehand, if there is a need for modification of the installation plan. We are available to support you along the way - Feel free to get in touch with us. We are happy to assist you further.
